How to Activate Your App

1. Open the email you received, preferably on the same device you will be using for the Ride & Ski App.
2. Click the iOS or Android links in the email you received.
   a. [iOS App (https://apps.apple.com/us/app/the-ride-ski-card/id1482798852)](https://apps.apple.com/us/app/the-ride-ski-card/id1482798852)
   b. Android App (http://bit.ly/rideskiandroid)
3. Paste the code you received in your confirmation email. It is _recommended_ that you copy and paste your code into the activation window. Please note that codes may be used only once, so ensure that the device on which you are installing the app is the one you will have with you at the mountain.
   a. BE SURE TO OMIT ANY LEADING OR TRAILING SPACES before/after the code.
4. You will be prompted to create an account. Please complete fields in the form and make note of your password. If you do not complete account setup here, your code will have been used – and will be invalid – so please be sure you complete account setup.
   a. Please make sure your email address is correct. **This is the single biggest issue users have – typos in emails.**
5. If the app asks if it can send you notifications – by saying yes, we will be able to send you flash sales and stuff. Don't worry, we won't abuse the privilege!
6. **Your app is now active!**
7. There are five tabs:
   a. Tour: Weekend tour events in chronological order
   b. Deal: Deals for gear, lodging, food, etc., sortable by type
   c. Card: Ski deals, sortable by state
   d. Snow: Snow report, same as on our website
   e. Account: Edit account details
      i. Note: **The arrow at upper right of the Account tab logs you out**. You will remain logged in until you select this. If you forget your password and need a new one, select "Forgot Password" on the login screen.
8. You may only use **one offer per mountain per day**. However, the card is good for multiple uses throughout the entire season.
9. If you are activating multiple cards, each new account **must have its own e-mail address** assigned as a user name.
   a. If you will be creating four accounts, please use four different e-mail addresses as user names.
